

BROOK TAVERNER

SEW EASY

EMBROIDERY SYSTEM

1

At the bottom of the jacket left front hem, you will find 2 concealed white tack stitches under the lining approximately 20 cm apart. Between these tack stitches you will find the **“Sew easy embroidery system”** access to the jacket inner.

2

With a steam iron, apply steam to the lining side between the tack stitches. This softens the resin which is holding the area closed. Leave for 3-4mins then the **“Sew easy embroidery system”** access opening can be peeled apart.

3

You now have access to the inside of the **“Sew easy embroidery system”** jacket. It is now suitable to position the jacket onto an embroidery machine & apply whatever design/logo is required.

4

After completion of the embroidery, the left jacket hem can be closed by positioning the jacket flat & ironing across the **“Sew easy embroidery system”** access area between the white tack stitches on the lining side, keeping the lining hem pleat positioned.
